Good washing guide		Detergent chemical	Rinse aid chemical
 Should dishes be prewashed with soaps or washing up liquids, dishes must be rinsed before placing inside machine. Washing up liquids should not enter the machine, as they can cause excessive foaming, which reduces washing performance and prevents draining. Excessive foaming can damage the machine. 	of washing up liquids and soaps can cause flooding and damage ine. errupt wash cycle. achine has reached correct temperature before washing. items not suited to a dishwasher in machine - only wash items to be washed in a dishwasher.	The Red Tube to the machine is used for detergent.	The Clear or Blue Tube to the machine is used for the rinse aid chemical.
Caution Danger Chemicals Danger Electricity Caution Danger Electricity Chemicals	Filters Filters provide protection for the passthrough's internal pumps and collect food, debris while washing. Don't use the machine without the filters in position.	The amount of detergent or rinse aid dosed depends on the quality and dilution information provided on the detergent chemical container. You may need to adjust the dosing quantity if you change the supplier of the chemical product. Please see the dosing guide for more information. Incorrect dosing quantities will always give poor washing results.
