Proven technology, speed and efficiency

Soluble ingredients remain popular in many parts of the world, not least because of their long shelf life but also because of their flexibility of use. Quick, uncomplicated and long-lasting. These words are characteristic of the Bolero series.

Simply choose your favourite beverage and the Bolero delivers a cup of coffee, cappuccino or caffè latte in next to no time. Make sure to choose the coffee strength and size on the screen to enjoy your perfect drink before making the selection. Otherwise the drink will be in your cup before you know, it's that quick!

The separate manual outlet provides hot water for tea.

Bolero suits many locations

With several models in the range, there is a Bolero soluble machine for every situation. Maintenance is uncomplicated and efficient. The touchscreen and design are fully in line with the latest standards and perfectly complement any interior.

The Bolero is perfectly suited for waiting rooms in public areas and self-service locations because they offer quick and easy preparation of drinks. In the care industry soluble machines are also the ideal solution for preparation of nutrition drinks and liquid meals.

Filling decanters has never been so easy

If you need to fill decanters or vacuum flasks with coffee or hot water it is often desirable to increase the tap height from 120 to 240 mm. We offer an optional pedestal for this purpose.

Enjoy the benefits

- Quick and user-friendly
- Proven technology
- Made from sturdy high-quality materials such as stainless steel and BPA-free plastics
- Hot water from a separate outlet
- Coffee strength and volume (S/M/L) can be selected on-screen
- Eco mode and boiler isolation for reduced energy consumption
- Uncomplicated rinsing and descaling programmes
- Patented mixing systems which greatly reduce any build-up of ingredients
- Transparent canisters make refilling easy
- Day and cumulative counters
- Various programmable settings to optimise the drinks of your choice

Cashless vending

The new series can be adapted to accept contactless payment or an inserted card. An MDB service set is needed to connect the machine with the online (payment) system. Connectivity offers many opportunities, for example to plan routing processes more efficiently and reduce machine downtime. Ask about telemetry and other options.

Branding

The Bolero lends itself exceptionally well to merchandising. Firstly, a personalised screensaver can be set for the full-colour touchscreen. The background and the pictures of the drinks can be designed to your specifications too. This way, you can use the Bolero as a marketing and communication method to promote your (coffee) brand.

Bolero 11
without hot water tap

Bolero 21
with hot water tap

Bolero 32/43
with hot water outlet

Up to 3 coffee specialties

The small Bolero model is available with one or two canisters. The canisters are transparent, so it is easy to check whether refilling is necessary.

Bolero 11

The Bolero 11 features one large canister. This model serves one hot beverage, for example hot chocolate or coffee. Note that we offer two models: with and without hot water. The separate hot water tap provides hot water for tea.

Bolero 21

With two canisters, you can fill one with soluble coffee and the other with topping (milk powder). This allows you to serve coffee specialties such as cappuccino, caffè latte and latte macchiato. The Bolero 21 is also available with and without the additional hot water tap.

Up to 36 hot beverages

Would you like to expand the range of beverages? Then opt for the wide model. This model is available with three or four canisters, so you can offer a wider range of hot drinks. Hot water comes from the separate outlet.

If you add cocoa you can extend the coffee specialties with hot beverages such as moccachino, espreschoc and espresso-choc.

The display offers a maximum of four screens offering a maximum of nine beverages per screen: 36 drinks in total.

Bolero 32 and Bolero 43

The Bolero 43 holds four soluble ingredients whereas the Bolero 32 holds three. The choice between three or four canisters depends largely on the variety of beverages you would like to offer your customers.

Solo

In addition to the soluble Bolero machines Bravilor Bonamat offers Solo, a separate dispenser for hot chocolate. Simply press the button and hot chocolate pours into your cup. The amount of water and cocoa can be programmed to your preferred cup size.

Bolero Turbo 403

Bolero Turbo XL 403

Heavy-duty machines for soluble ingredients

Some locations require more capacity. In the health sector for example many clients and visitors want coffee and tea continuously all day long. But also at events during peak hour over lunch in conference centres coffee and tea need to be ready quickly. For situations like these Bravilor Bonamat offers the Bolero Turbo (XL) machines.

- Both machines can brew two 2-litre decanters simultaneously in 90 seconds.
- Both machines are available in 400V versions increasing the throughput per hour even more, preparing almost 1.000 cups per hour.
- Both machines feature a tip up grid allowing the easy placement of cups and mugs.
- In addition the Bolero Turbo units feature a digital display making the beverage names clear to all users.
- Depending on the number of canisters and the soluble ingredients of your choice you can offer up to 8 hot beverages such as: coffee, cappuccino, caffè latte or hot chocolate.
- Hot water is dispensed through a separate outlet in the middle.
- Descaling signal, rinsing program, rinsing function (on the control panel itself) and day/cumulative counters to keep track are included too.

Bolero Turbo is the high-volume solution of the Bolero series.

Stainless steel vacuum flasks

Bravilor Bonamat offers vacuum flasks too. The high-quality double-walled flasks are available in: 0.9 l, 1 l, 1.2 l, 1.5 l and 2 l.

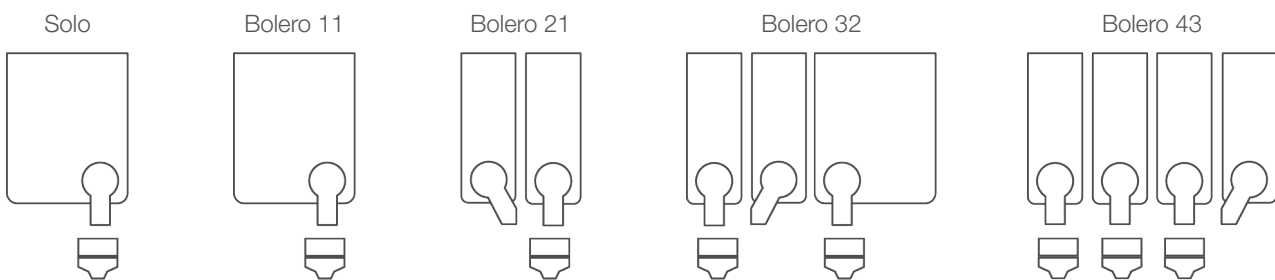

Thanks to the thermos-isolated characteristics the flask keeps your coffee in perfect condition.
