

THE CHEF'S DRAWER

Provides bulk storage of fresh or frozen food right where you need it. Its low level height is perfect for suiting with many prime cooking stations and you can stack Chef's Drawers for the ultimate in fridge / freezer flexibility.

THE CHEF'S DRAWER

The Chef's Drawer is a large, space saving refrigerated drawer unit, an ideal solution for pubs, steakhouses and catering facilities where space is often limited.

Available in two sizes/formats depending on application, both models provide flexibility and control, allowing the operator to set the unit's temperature as refrigerated or freezer storage, anywhere between +1 to -22°C.

At just 670mm deep, the **VSWCD1** is ideal for standard 700mm work-surfaces, leaving 30mm extra depth for plug sockets. Two stacked units will fit under a 900mm high work-surface.

The **VRWCD1** model fits perfectly with popular prime cooking suites, such as Falcon Foodservice Equipment's F900 Series (Dynamic Link System). Models are available as a refrigerator or freezer and can be stacked for added flexibility, maximising product footprint.

Williams Chef's Drawers are designed to be robust and are built using tough stainless steel both for the exterior and interior. Ingredients can be stored within the self contained drawer of all models which can also accommodate 2/1 GN pans, up to an impressive depth of 150mm.

The units have removable drawers and fittings for ease of cleaning. Their cassette type refrigeration systems are also easily removable, helping facilitate convenient on-site servicing and maintenance.

The height of the Chef's Drawer can be varied thanks to a choice of three different sizes of swivel and brake castors, which also offer mobility and stability when positioning, or the option of adjustable legs.

All models are fitted with the Williams CoolSmart controller and have been designed to perform in an ambient environment of up to 43°C.

- Drawer size 2 x 1 GN (150mm maximum depth)
- Removable refrigeration system designed for easy on-site service and maintenance (VRWCD1 models only)
- R290 natural refrigerant
- CoolSmart controller
- Precision injected, high density polyurethane insulation with low GWP (Global Warming Potential) and zero ODP (Ozone Depletion Potential)
- Heavy duty, non-marking swivel castors with brakes
- Stacking capability helps maximise storage capacity
- Front-breathing and rear/side venting refrigeration system
- High performance helium leak testing
- Magnetic balloon door gaskets with 100% tight seal

TECHNICAL DATA

	Temp	Width (mm)	Depth (mm)	Height (mm)	Capacity	Energy Grade
VRWCD1	+1/+4°C or -18/-22°C	880 (677)	850 (522)	528 (268)	94 (3.3)	D
VRWCD1S - Stacked*		880 (677)	850 (522)	928 (268 per section)	188 (6.6)	D
VSWCD1	+1/+4°C or -18/-22°C	1100 (690)	670 (553)	486 (190)	105 (3.7)	D
VSWCD1S - Stacked*		1100 (690)	670 (553)	838 (190 per section)	210 (7.4)	D

Unit dimensions are shown external(internal). Capacities are shown in Litres(cu.ft).

* Please note that these models have a separate power supply per drawer section
