

Portable Table Top Gas Cooker

Model: BS100S

Unique features for safe use indoors or out

Sensors cut gas flow unless flame is lit

Red button gas safety trip prevents unsafe pressure build-up

Placement protection; cartridge must be aligned correctly to activate keyway

Reverse spill tray protection; spill tray must be in upright position to engage gas cartridge

Only use gas appliances in well ventilated areas

The new BS100S is all about functionality and safety

The BS100S is our safest, most efficient, most controllable portable gas cooker yet.

Redesigned pan support lifts the cooking pan for improved even heating. A new burner gives more control without power loss. The new BS100S has been fully tested with larger pans commonly used throughout Europe. The BS100S has a redesigned pressure switch and insulation meeting all international standards for fail-safe cartridge safety.

Tested for use inside and outdoors.

Available in two colours; Anthracite/Charcoal and Stainless Steel.

Stable design – suits pots, pans and kettles with up to 20cm/8" base

Double-ring vortex burner for balanced fuel/air mix for steady heat

Flame-protection collar for consistent heat, even in windy weather

Piezo ignition

Each A4 Butane Battery® gas cartridge lasts 90 minutes on high and up to 4 hours on simmer
