

Planetary Mixer Instruction Manual

Pack Contents

The following is included:

•Food Mixer •Spiral Dough Hook •Whisk

•Mixing Bowl •Beater • Instruction Manual

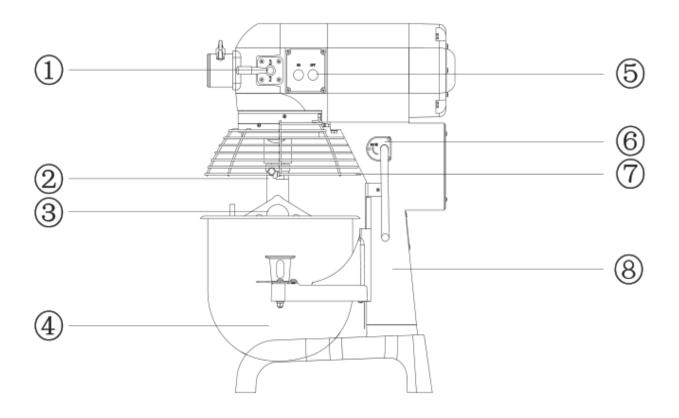

General Description

This is a kind of changing speed gear mixer. With its planetary stirring design, it has a compact structure, high efficiency, power saving and easy operation. It provides as an ideal assistant to you for bread and cake making.

Technical Parameters

| Name | Power (KW) | Weight (KG) | Speed o | of Stirring Shaft | Overall Dimensions | |
|--------------|------------|-------------|-----------|-------------------|--------------------|-----------------|
| | | | 1st Speed | 2nd Speed | 3rd Speed | (mm) |
| 10L | 0.55/0.75 | 45 | 108 | 195 | 355 | 505 x 475 x 710 |
| 20L | 1.1 | 106 | 108 | 195 | 355 | 630 x 590 x 890 |
| 20L with hub | 1.1 | 108 | 108 | 195 | 355 | 630 x 590 x 890 |
| 30L | 1.5 | 178 | 91 | 166 | 282 | 710 x 670x 1270 |
| 30L with hub | 1.5 | 180 | 91 | 166 | 282 | 710 x 670x 1270 |

Main External Parts of Mixer

- ① Gear change hand lever
- ② Stirring shaft
- ③ Mixer
- 4 Stainless barrel
- (5) Power switch
- 6 Bent lever
- Safety guard (may choose the fitting)
- Support

Operation Instruction

- ① Standard power supply v/ HzAc. (Please use a plug with 3 wide contacts and good grounding.)
- ② Installation of mixer: Put the stirring shaft 2 in Mixer 3 and rotate it in clockwise direction.
- ③ Starting procedures: Pull the hand lever 6 to raise the bowl and close the safety grille 7 to the closed position. Select the speed required by moving the gear change hand lever 1 before starting, then turn on the power switch 5. Run the mixer for a maximum of 30 minutes of constant run.
- ④ Speed transformation: If you want to change speed, please turn off the power switch 5 firstly, and then pull the gear change hand lever 1 to the position required.
- ⑤ Shutting down: when the operation is complete, turn off the power switch 5 firstly, then pull the gear change hand lever 1 to position 1, and pull back the hand lever 6 to the lowest point and finally disconnect power supply.

Accessories and Functions

- ① Whisk: Used for stirring of liquid material, such as cram and egg. Recommended speed: mid or high speed.
- ② Beater: Used for stirring of paste, powder and fragmental material, such as stuffing and cake dough. Recommended speed: start with low speed, end with mid speed.
- ③ Spiral dough hook: Used for stirring of sticky material, such as dough. Recommended speed: low speed.

Notes

- ① The power socket must be provided with a good ground wire to guarantee the mixer's good grounding through it. There will be an electric shock if no ground wire or an improper grounding mounted. The ground wire can never be connected with gas pipe, water pipe, lightning rod or telephone line. Electric leakage should be checked after installation. Once the power line damaged, the user must replace them in the special maintain service company.
- ② Don't put your hands into the stirring barrel during operation. Power supply should be disconnected before the mixer is going to be installed.
- ③ Don't operate the mixer beyond the time limit to prevent reduction of its service life
- ④ The mixer should be mounted on a stable and clean place. Keep it away from overheated or over-wet places and away from equipment which has strong electromagnet or can produce strong electromagnet.
- ⑤ Keep the machine clean constantly. Disconnect power supply before maintenance. Clean it with a piece of soft and a bit wet cloth. Don't clean it with liquid or spraying detergent.

Maintenance

Clean the bowl and stirrer daily or after use to maintain hygiene standard.

The transmission gear box is greased in factory. Check the greasing each 6 months. To ass or refill grease, open the top cover, then fill grease from aperture or replace the grease directly.

Trouble Shooting

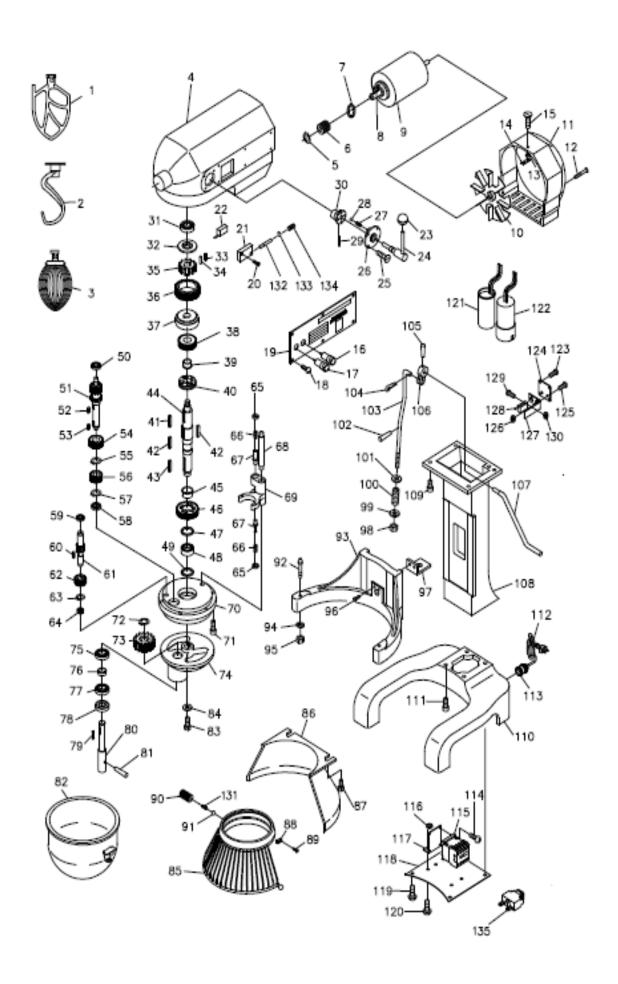

| Problems | Causes | Solutions | |
|---|---|---|--|
| Tool shaft does not rotate after starting the machine | Loosen electric wiring | Check electric wiring, tighten those loose connects | |
| Oil leakage | The seal rings are worn out | Replace seal rings | |
| | Too low voltage | Check the power supply | |
| Motor temperature raised while reduced output speed | Overloaded | Reduce load | |
| | The sped of mixing is too high or using a wrong stirrer | Select a suitable speed and stirrer | |
| The mixing knocks with the bowl | The stirrer or bowl is deformed | Repair or replace the stirrer or bowl | |
| Abnormal noise and high temperature from gearbox | Insufficient lubrication | Add or replace the grease | |
| Accessories canno0t be removed from motor | Debris (flour)stuck in the spigot / attachment | Clean the attachment and spigot with warm water, push upwards and turn to disengage fitting, pull down to withdraw attachment | |

Warning!

If the equipment is out of function, please make sure that it is serviced by professional person or please turn to special service point.
