

## **SERVE OVER COUNTERS**

**MANUAL OF INSTRUCTIONS FOR USE AND INSTALLATION**

### **Foreword**

Our compliments on having chosen one of our products, which are the result of technological experience and continuous research in order to obtain a product which is superior in terms of safety, reliability and performance.

This manual contains all the information and advice necessary to operate with maximum safety and efficacy.

### **Introduction**

This publication provides the instructions for use and maintenance and includes the spare parts catalogue.

**MUST BE FOLLOWED RIGOROUSLY.  
ONLY ORIGINAL SPARE PARTS MUST BE  
USED.**

Technical instructions, drawings, tables and everything else contained in this manual are reserved and therefore cannot be passed on to third parties without written consent from the manufacturers, who are the sole proprietors and reserve the right to introduce any changes deemed suitable without prior notice.

In case of controversy the valid reference text is the italian one.

Before starting up the machine read carefully the instructions in the manual for use and maintenance, bearing in mind that the manual is a component of the machine and must be carefully preserved. In the event of loss or damage, ask for a new copy, stating the model and date of purchase.

**THE MANUFACTURER IS NOT RESPONSIBLE FOR ACCIDENTS OR RUPTURES DUE TO NON OBSERVATION OF THESE INSTRUCTIONS**

For electrical connection use a plug according to safety laws and equipped with safety circuit breaker. Ensure that the voltage and capacity of the power supply are adequate to the power absorbed by the motor.

**WARNING!**

**DISCONNECT THE POWER SUPPLY BEFORE  
CARRYING OUT ANY MAINTENANCE ON  
ELECTRICAL PARTS.  
CONTACT CAN CAUSE DEATH.**

**● GENERAL REGULATIONS**

Main characteristics: dimensions, capacity etc. are listed in the pages 23 and marked on the CE-plate.

**● CONTROLS**

After receiving the apparatus you should check immediately if there are damages caused during the transport.

Unpack the apparatus and make sure that the accessories are enclosed.

In case of damages during the transport make your reservations to the truck driver; within three days you should confirm your reservations with registered mail to the transport company with a copy of the letter to STUDIO 54 or to the authorized resaler. All complaints must be received by us within eight days.

**● CHARACTERISTICS**

The refrigerators series SHADOW have been projected, constructed and tested for assuring the conservation of beverages and food for a short time .

CONSERVAZIONE PRODOTTI FRESCHI (TN)		
	Temperatura	Durata (settimane)
Carni	0÷+2 °C	1 - 3
Frutta	8÷+15 °C	2 - 4
Latticini	4÷+8 °C	Varia
Vegetali	6÷+10 °C	2 - 6

Defrosting and evaporation of the condensed water which is collected in the basin are completely automatic.

**● INSTALLATION**

After unpacking the refrigerator, place it in the final position. Please note that the freshest and most ventilated place of the room assures an optimal functioning and a lower energy consumption as the apparatus is less stressed in this case. Check the levelling of the refrigerator and the lining-up of the doors and in case adjust the feet .

Check whether the adjusted temperature on the thermostat corresponds to  $\pm 10\%$  according to the thermometer .

**● START-UP**

Connect the apparatus to the electrical power line (220/50) after having checked the voltage (allowance  $\pm 10\%$  ) and switch it on by the main switch .

## ● CLEANING AND MAINTENANCE

Wash the inside of the refrigerator with water and neutral detergent. Then dry it carefully and position the slives and shelves according to your needs ( at least every six months).

Adjust the thermostat or the control board according to enclosure on the desired working temperature .

Clean periodically the condenser with a brush or a vacuum cleaner after having switched off the electrical contact.

## ● BAD WORKING

In case of abnormal rising of inside temperature of the apparatus, check first of all whether:

-the plug is fixed well on the socket

-there are voltage variation of  $\pm 10\%$ .

In case of bad working after having checked the above mentioned points, please, call your supplier.

Tell him the type of your refrigerator and its serial number: you will find them on the data board of each apparatus.

## ● IMPORTANT

The guarantee must be filled in and sent to the producer company within eight days after the start-up.

## ● GUARANTEE PERIOD

The apparatus is covered by a guarantee of 12 months after the purchase date (electrical parts excluded). Spare parts which have to be replaced under guarantee will be delivered ex-works.

In case of material deliveries under guarantee/replacement, the same material will be forwarded only after returning of the defective one which is covered by guarantee.
