Thank you for purchasing your Chefmaster Automatic Juicer. To make full use of the product please read this manual carefully before using the product and keep it safe for future reference.

### **Safety Tips**

- If you find any damage when the product is unpacked, contact your Chefmaster supplier within 24 hours of receipt of goods
- Always position on a flat stable surface
- Repairs should always be carried out by a qualified technician
- Do not use this product if the cone is damaged
- Keep hair & clothing clear of the unit when using it
- Do not use this product outside
- Always switch off and unplug the unit before cleaning
- Move by holding the product by the base
- Do not remove the lid of the machine until the disc and basket have finished moving
- Always use the pusher provided, never try and insert your hand into the hopper
- **Never use this product for ice, frozen fruit or vegetables**
- Always store upright.
- If the power cord becomes damaged it must be replaced by a qualified technician
- This product is not designed to be used by persons with reduced physical or mental capabilities, lack of experience or knowledge, unless they are given suitable supervision - this includes children.

## Unit Diagram

No	Description
1	Motor Base with Safety Arm
2	Spout Assembly
3	Bowl
4	Flange
5	Basket Assembly - including Grating Disc & Sieve
6	Lid
7	Hopper Plate with feed tube
8	Pulp container
9	Ingredients Pusher

## Assembly

Before assembly ensure you wash all parts that will come into contact with food.

1

Position the motor base so that the On/Off buttons are facing you.

2

Place the bowl on to the motor base

3

Fit the flange onto the rim of the bowl. The ribs of the flange should be lined up with the flat panel of the bowl. Check that the flange is correctly fitted.

4

Lower the basket into place, holding it by its handles. Rotate until it slots into place.

5

Line the lid up with the notches in the flange.

### IMPORTANT

Please ensure that the pin on the motor shaft is correctly lined up with the corresponding notch in the basket assembly hub.

6

Position the pulp container and the hopper plate

7

Raise the safety arm.  
To start the machine, press the on button.  
The juicer will not start unless the safety arm has been correctly positioned to engage the safety switch.

## **Before Use**

- Remove all packaging including all protective plastic from your Chefmaster Automatic Juicer
- Position on a flat surface
- Plug your Chefmaster Automatic Juicer into the mains
- Ensure the safety arm is locked in place
- Ensure the pulp collector is in place
- Position a jug or glass below the spout
- The juicer will now be ready to use

## **Caution**

Do not process very hard fruits & vegetables (i.e. Coconut)

Always remove hard stones from fruit (i.e. peaches, apricots and cherries)

Do not process frozen fruit or ice.

## **Fruit and vegetable preparation**

Always wash fruit and vegetables thoroughly.

- Carrots – Peel, top and tail
- Apples – Whole as long as they fit within the hopper
- Strawberries – Remove stalks
- Citrus Fruit – Peel and can be left whole if they fit within the hopper
- Pineapples – Peel and cut into chunks (3 recommended)
- Melons – Peel and cut into chunks (8 recommended)
- Tomatoes – Wash and leave whole, as long as they fit within the hopper
- Peppers – Wash and cut into strips so they fit in the hopper
- Cucumber – Peel and cut into chunks
- Ginger – Cut into chunks, no need to peel
- Grapes – Remove stalks to avoid a bitter taste
- Mangoes – Peel and remove the stone, then cut into chunks
- Celeriac – cut into 6-7cm chunks
- Fennel – cut into 6-7cm chunks

This juicer is **not** suitable for very hard fruit & vegetables like Coconut

**Always remove** hard stones from fruit such as Peaches, Apricots & Cherries

## **How to use**

- Ensure the locking arm is in place, if not the unit will not start.
- Ensure the pulp container is in place at the rear and a jug is under the spout
- Push the on button.
- Insert the fruit or vegetable into the hopper, use the pusher to slowly push it completely down into the hopper.
- Once you have finished juicing, leave the machine to run for a few seconds to allow all the juice to be extracted.

## **Cleaning & Maintenance**

- Before cleaning, disconnect the juicer from the electricity supply.
- Never immerse the motor base in water or use a spray gun. Wipe the base with a damp soft cloth.
- Remove all other parts and rinse with hot water. During use, you may need to remove and empty the basket, if it has become blocked with pulp
- If juicing large quantities you may need to remove the pulp container
- Always clean your Chefmaster Automatic Juicer daily

## **Troubleshooting**

<b>Fault</b>	<b>Possible Cause</b>	<b>Solution</b>
The power indicator light is not on	The unit is not switched on The plug or lead are damaged The fuse has blown	Check the unit is plugged in and switched on Contact your Chefmaster distributor Replace the fuse
The unit will not switch on	Safety switch	Ensure the unit is properly assembled and the locking arm is correctly positioned
The unit is vibrating during use	The basket maybe blocked	The basket can sometimes have more pulp unevenly distributed within it, clean the basket
