

Kebab Grills

GR60G

This powerful gas kebab grill enables you to adjust the heat on to the meat as the whole element assembly slides front to back and can be locked off in any position. The spit remains fixed so there is no possibility of the meat falling. You can also adjust the heat as each burner has a half / full power setting.

The motor is fully protected underneath the spit assembly. The base plate is hermetically sealed so the motor is protected from infiltration by fat or juice from the meat. Mounted on ball bearings, the motor does not bear the weight of the meat nor can it be knocked when the spit is loaded.

Features: 3 ceramic burners with independent control, Front access drip tray

Optional accessories: drainer tray; 3 sided splash guard; side heat deflectors; glass doors

model shown with optional drainer tray, splash guard and heat deflectors

Weight	25kg
Dimensions (mm)	580 X 660 X 870
