**"THE" MINI COMBI OVEN**  
Compactness without compromise

525 mm

**MORE COMPACT**  
*With Minijet,*  
**rethink your kitchen !**

*Minijet*, all the cooking performance of a standard oven in a compact package ! It can free up to 40cm of space.  
 Rearrange your workspace with **another module or a new plating area.**

*Minijet*, the first compact oven on the market that has everything a large one does.

Save time and produce more !

## MORE COMPACT

### REDUCE THE SIZE OF YOUR OVEN

By adapting the size of your oven to suit your daily production requirements, *Minijet* allows you to **increase your work area** or to **install additional equipment without redesigning the kitchen**.

### PLUG & PLAY

Because it is so easy to install, *Minijet* will fit in the smallest space and you won't need to change your electricity meter, it can be connected with a 230volt plug.

**A restaurant kitchen, a room service station, a servery counter, *Minijet* is the ideal answer to your need for space and power.**

Surprise yourself by discovering the capacity of *Minijet* !

#### During preparation

- **Viennese pastry** : 60 pieces per pass
- **Meringues** : 12 plates per pass
- **Roast beef** : 6 pieces per pass
- **Poultry** : 12 Chickens per hour
- **Fresh broccoli** : 10Kgs every 10 mins
- **Gratin dauphinois** : 80 portions every 30 mins
- **Low temperature meat in sauce** : 10Kgs per cycle

#### During service

- 12 plates regenerated per pass
- 6 levels with direct access

Minijet can be up against a wall without clearance spaces.

#### CHEF TIPS :

Use the 12 levels available to do your preparation work for the week.

### ENJOY USING VISIOPAD

VisioPAD becomes the favoured way for you to communicate your cooking requirement. In just a glance, VisioPAD tells you everything you need to know about the current cooking cycle.

#### CHEF TIPS :

Put your savoir-faire into all your recipes recorded through VisioPAD.

Take advantage of 18 programmed multi-phase recipes and backup HACCP data on a USB stick.

### CHANGE WHAT IS COOKING TO SUIT YOUR NEEDS

A delayed delivery, a last minute reservation, *Minijet* liberates your spirit by guaranteeing rapid cooking with constant availability.

Combining browning cycles and low temperature cooking in less time, *Minijet* preserves moistness and limits weight loss.

### FLUIDITY OF SERVICE !

The way *Minijet* responds improves the service to your customers concerned about rapidly responding to and increasing the number of covers you can cater for.

Only *Minijet* is capable of changing cooking temperature in a few seconds !

- less than 2 mins are enough to drop from 200°C to 80°C.
- in steam mode saturation of the oven cavity is immediate.

#### CHEF TIPS :

The oven cools down automatically with the door shut ! No fumes discharged into the kitchen. Fumes and grease are captured by the extract canopy.

BONNET

*Minijet* adapts to the rhythm of your service

## MORE PRECISE

To the  
degree

## THIS IS WHAT SAVOIR-FAIRE SHOULD LOOK LIKE !

The ventilation quality is due to an **auto-reversing fan**.  
Browning performance is identical to that in a standard sized  
BONNET combination oven.

## BRING MORE CRISPNESS TO YOUR COOKING

AirDry+ technology: crisp products in record time.  
Less than an hour to produce crisp and tender fruit chips.

## GIVE YOUR DISHES A BOOST

Risk precise cooking to absolutely accurate **temperature**  
**thanks to CoreControl technology.**

The cooking mode has little importance, the oven **will always**  
**alter the power to suit the load.**

When you are cooking, *Minijet* analyses the point in the  
temperature increase and the settings to anticipate peaks in  
temperature and avoid overcooking. No matter what the load,  
fresh or frozen products, *Minijet* **adjust the real cooking time**  
to guarantee **consistency** every day of the week.

Whether you are cooking 1 or 10kgs of vegetables your  
customers will get **the same results** without any action on  
your part !

### CHEF TIPS :

**Opt for the removable core probe which ensures cooking  
in complete serenity.**

## EVEN CLEANER

### SEE IT WITH YOUR OWN EYES

*Minijet's* automatic cleaning system requires no intervention on your part and lets you keep your oven clean throughout the day.

Remain in control of what you buy! The automatic washing system developed for *Minijet* doesn't impose any specific detergent.

*Minijet* offers an intensive wash cycle that will keep your oven as clean as it was on day one.

**Less than 20cl of chemicals**

**17 minutes per wash**

**Gain over 2 hours cooking time per day !**

#### CHEF TIPS :

Think about using the automatic rinse function if the last cycle left your oven dirty. 3 minutes is all it takes to wash away the worst of the debris.

### AN OVEN THAT RESPECTS THE ENVIRONMENT.

The wash phase is known to be water hungry, this is why BONNET has developed a high performance system to **limit consumption whilst guaranteeing perfect results.**

Compared to a standard oven, *Minijet* reduces your cleaning consumption considerably.

**Water - 12%**

**Energy - 84%**

By automatically adapting the power to suit the load being cooked CoreControl technology limits energy consumption.

Once the cooking cavity temperature stabilises, *Minijet* consumes no more than 30% of its power. Real savings every day !

BONNET, working with BUREAU VERITAS CODDE, has studied the life cycle of its *Precijet*, range from extraction of natural resources through to recycling at the end of its useful life.

BONNET is committed to offering you ovens that respect the environment.
