CONNECTA HEF718 INSTALLATION TEMPLATE

1. READ THE 'INSTALLATION' AND 'CARE & MAINTENANCE' INFORMATION
2. PEEL & STICK TEMPLATE IN POSITION
3. DRILL THROUGH THE 6x CROSS MARKS FOR WALL FIXINGS

INSTALLATION: CONNECTA products are designed to be easy to install. When installing hand basins ensure that the wall structure is sufficiently sound to support the product during use. Ensure that suitable wall fixings are used. If in any doubt, do not complete the installation.

We accept no responsibility for loss or damage caused as a result of poor installation or operator misuse such as the overflowing of hand basins. Test the strength of the installed product and advise the customer regarding the safe operation of the product(s) before leaving site.

CARE & MAINTENANCE: All grades of stainless steel can stain and discolour through general use. In order to keep your CONNECTA product in good condition, it should be kept as clean as possible. With proper care, your CONNECTA product will give many years of service life.

Care should be taken during installation to ensure that surface contamination is avoided. The best way to do this is to leave the protective plastic film in place as long as possible during installation, and then remove it just before the product is used.

For general cleaning use soap or mild detergent and water on a sponge. Rinse with clean water and wipe dry if necessary. For heavier stains use a mild household cleaning solution, rinse well with clean water and wipe dry if necessary. Avoid abrasive cleaning products such as scourers.

Thank you for choosing CONNECTA products.
