JET Series

High quality no nonsense Italian manufactured glasswashers. The Jet series truly delivers economy without compromise.

The Jet series has been designed to deliver the best possible value in a simple glasswasher. The range has been built around three simple but vital features;

- Simple operation, full control of the machine is via the simple switch panel.
- Maximum load height, allowing even the tallest of glasses to be washed with ease.
- Robust construction, the cabinets are built from stainless steel to be long lasting and durable.

Standard Features

- Stainless steel construction
- Double skinned door
- Ergonomic full width door handle
- 2 minute wash cycle
- 13amp for easy installation
- Timed rinseaid pump
- Timed detergent pump (excl. JET35E)
- Independent wash and rinse elements
- 60°C wash temperature
- 80°C rinse temperature
- Compact design
- Simple operation
- Adjustable feet
- Stainless steel wash pump filter

Full length ergonomic door handle for ease of operation and durability.

Simple operation, the Jet Series are controlled via a large, simple control panel for quick and easy use.

Maximum load height, the Jet Series has been designed to maximise the loading space so that even the tallest glasses can be washed with ease.

Light weight efficient composite wash arms allow for maximum rotation during washing and rinsing for unparalleled water distribution.

Clean lines and a stainless steel finish allow the Jet series to be installed in both front and back of house situations.

Economy Without Compromise
