

IM-65NE-HC CUBE ICE MAKER

Key Features

The IM-65NE-HC is a compact sized cube ice maker, which utilises Natural Refrigerant R290.

Energy efficient, with savings of 15% compared to HFC equivalent model.*

- Smallest member of the Emerald Class, Hoshizaki's new range of climate friendly ice makers.
- Can produce up to 62kg of cube ice per 24 hours (AT.10°C.WT.10°C).
- Unique ice making system that has an automatic rinse cycle. After every new batch of ice, the water reservoir drains and refills with fresh water. System comes with a magnetic water pump that has no direct coupling, which prevents any leakage.
- Closed water circuit offers the ultimate contamination protection, by reducing the number of points at which impurities can enter the ice making process.
- Electronically controlled to ensure an optimised ice making process under varying circumstances without the need for physical adjustments. Quality of ice is always consistent.
- Easily cleanable air filter allows end-users to carry out routine cleaning schedules. Extends product life expectancy and reduces the frequency and costs of maintenance call-outs.
- Stainless steel exterior with integrated door handles provides a hygienic and high quality finish.
- Based on Internal comparative study. Please contact your local sales branch to find out more.
