

GASKET SIZING GUIDE

HOW TO USE:

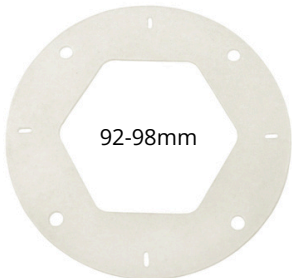

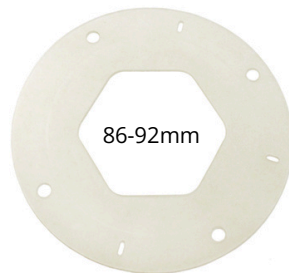

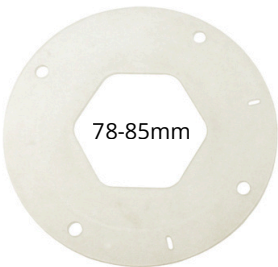

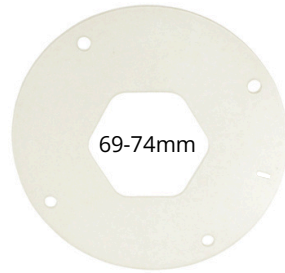

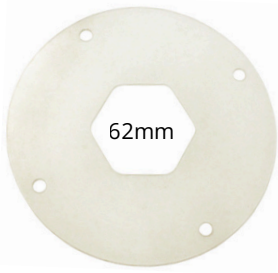

To measure, place the rim of your cup onto the black straight line on the diagram. If it fits into a coloured band, follow the line below to see which gasket is optimal.

If the cups falls into the white space, send us a cup sample and we can recommend the correct gasket size.

GASKETS

Bonzer Gaskets are made from food-grade silicone, offering a secure fit and smooth operation, designed to withstand daily usage. The size range from an espresso cup to large cinema-sized cups, with all the standard sizes in between.

All gaskets are equipped with size indicator holes for easy recognition.
