

Heated Bain Marie

Troubleshooting Guide - With the appliance unplugged, empty and cool.

Unit not working / dead	Check/replace the plug fuse.
	Check socket and ring main are working and switched on.
	Check the cord and plug for condition
	Check the dial is set to correct temperature
	Thermal cutout has been activated - see below
Thermal cut out reset	Disconnect and allow to cool
	Press reset button and restart the appliance.
Power indicator light is not on	Perform above checks
Unit is on but not heating	Check thermostat temperature selection
	Thermostat may need replacing - contact approved service agent
Unit not emptying from tap	Check the drain tap is open correctly
	Check the drain tap is not blocked using suitable tools
