### Mounting castors

1. Remove all packaging materials. Then extend the main part fully.
2. Install the castors as shown (Fig.1 and Fig.2), ensuring the braked castors are on the same frame at the bottom.

### Adjusting the peg height

1. Place a plate to test if the peg height is proper.
2. If the plate is inclined, the peg is too loose. Turn the corresponding adjuster screw clockwise until the plate is level and stable (Fig. 3).
3. It is recommended to place plates of same size into the peg arms of same set vertically.

### Notes for use:

#### Important:

- **Adjust the peg to proper height by turning the adjuster screw at the top (There are 4 screws and 4 sets of peg arms in total, with each screw responsible for adjusting corresponding set of peg arms vertically).**
- **Do not overload the rack as this will cause the arms to bow.**
- Position and use on a flat, stable surface.
- Children should be supervised to ensure that they do not play with the appliance.
- When not in use, ensure to set the brakes on the castors to keep the trolley locked in place.

- **Daily cleaning:** Wipe clean with a damp cloth.
- **Stubborn stain:** With a clean cloth soaked in a mild soap solution, gently remove the stain.
