# NEW INTEGRAL STAINLESS STEEL ICE FLAKER

## Description

Brand new for 2026, the BFI range of ice flakers builds upon the incredibly popular BIM range of ice machines to offer another option for premises looking to add cost efficient ice making to their portfolio.

Perfect for food display solutions such as a fresh seafood counter, the flaked ice created by the BFI range perfectly conforms round the product offering consistent surface cooling. These fantastic units benefit from the same digital controller and strong stainless steel build as the rest of the Blizzard ice machine lineup.

## Features

- Stainless steel & black ABS body
- Produces granular flaked ice
- Low water consumption
- Easy to use electronic controls
- Fully automatic operation
- Removable filters
