

## Vegetable preparation unit

## Troubleshooting Guide - Appliance unplugged and clean.

|   |   |
|---|---|
| Unit not working / dead                           | Check/replace the plug fuse.  |
|   | Check socket and mains power supply are working and switched on.    |
|   | Check power cable and plug for condition                            |
|   | Ensure all components are installed correctly                       |
|   | Check micro switches / safety interlocks are engaged                |
|   |   |
| Indicator is illuminated but unit is not working. | Perform the above checks  |
|   | Check all components are positioned correctly                       |
|   |   |
| Appliances stops during use                       | Ensure all components are installed correctly.                      |
|   | Close any covers/lids   |
|   | Lower handle in accordance with standard operation                  |
|   | Ensure unit is not overloaded or blocked.                           |
|   |   |
| Vegetables are not ejecting                       | Unit is blocked internally. Unplug, empty the chute or cutting bowl |
