

P9EO

ELECTRIC OVEN

The Parry P9EO fan assisted electric oven is versatile and powerful. The stainless steel exterior features a flat counter top, able to accommodate other products – hobs, griddles and bain maries, for example, as well as doubling as a worktop. The oven itself features two separate 2.5kW fan assisted elements, providing a total of 5kW of cooking power. The stainless steel construction and castors ensure the unit is durable and easy to clean, while the simple dial controls and side hinged doors make it incredibly user friendly.
